PROFESSIONAL SUMMARY

MERN Stack Developer with nearly one year of hands-on experience building responsive, API-driven web applications and admin panels using React.js, Node.js, Express.js, MongoDB, MySQL and Tailwind CSS, with additional experience in PHP, HTML and CSS. Delivered three client projects, two of them live in production, and currently building Serviq, a restaurant management platform, where I own the admin panel UI, the inventory management module and the complete frontend-backend API integration. Quick learner with a good eye for clean UI and a commitment to writing maintainable code.

SKILLS

Languages: JavaScript (ES6+), PHP, SQL, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Bootstrap, Reusable Components, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, CRUD Operations, API Integration

Database: MongoDB, MySQL, SQL

Admin & Business Modules: Admin Panels, Admin Dashboards, Inventory Management, Email Integration, Form Validation, Error Handling

Tools: Git, GitHub, Postman, VS Code, Antigravity

WORK EXPERIENCE

MERN Stack Developer | Ocean Softwares Private Limited, Tambaram **April 2026 - Present**

- Develop and maintain responsive, production-ready web applications using React.js, Node.js and Express.js for client projects.
- Build complete admin panels, from UI design to backend API integration, for restaurant, theatre and charity clients.
- Develop an inventory management module and admin dashboards for managing content and records through secure CRUD operations.
- Build reusable React components and maintain a consistent, mobile-friendly UI across screen sizes using Tailwind CSS and Bootstrap.
- Design and integrate REST APIs between frontend and backend for dynamic, data-driven features, with form validation and error handling.
- Work with MongoDB, MySQL and SQL databases to store and retrieve application data for admin and customer-facing modules.
- Deliver end-to-end client websites, from requirement understanding and UI development to API integration, testing and live deployment.
- Integrate email functionality into client websites so enquiries and form submissions reach the business owners directly.
- Convert client requirements into clean, user-friendly interfaces with consistent layouts across desktop, tablet and mobile.
- Debug and fix issues, test APIs with Postman, and improve application performance and code quality.
- Collaborate with the team using Git and GitHub, and deliver client projects on schedule.

KEY PROJECTS

Serviq - Restaurant Management Platform (Ongoing) **Ocean Softwares Pvt. Ltd.**

- Building a restaurant management platform and solely responsible for the admin panel, inventory management module and frontend-backend integration.
- Developed the complete admin panel UI for managing restaurant operations and records, with responsive layouts and reusable components.
- Built the inventory management module to add, update, track and manage stock items with full CRUD operations.
- Integrated the entire admin panel with backend REST APIs, with form validation and error handling.

Tech Stack: React.js, Node.js, Express.js, REST APIs

Private Theatre Booking Website & Admin Panel (thetinytheatre.in) **Ocean Softwares Pvt. Ltd.**

- Developed both the customer-facing website and the admin panel for a private theatre booking business, now live in production.
- Built responsive pages for theatre details, available slots and booking enquiries using React and Bootstrap.
- Created an admin panel to manage bookings, slots and website content with full CRUD operations.
- Integrated frontend and backend through REST APIs, with form validation and error handling.

Tech Stack: React.js, Node.js, Express.js, SQL, Bootstrap, REST APIs

Charity Website with Admin Panel (anbusuzhulagu.org) **Ocean Softwares Pvt. Ltd.**

- Developed a public charity website, now live in production, along with a separate admin panel for managing website content.
- Integrated APIs for admin operations and for displaying data on the public website.
- Tested API endpoints with Postman and managed code with Git and GitHub.

Tech Stack: React.js, Node.js, Express.js, SQL, REST APIs

Meadows - Land Sale Website (campaign.assettreehomes.com) **Ocean Softwares Pvt. Ltd.**

- Created a land listing and sales website with a responsive, user-friendly design using HTML, CSS and PHP.
- Built property listing pages and an enquiry form so customers can view available lands and contact the business.
- Implemented email integration in PHP so enquiry details are sent directly to the business owner by mail.

Tech Stack: HTML5, CSS3, PHP, Email Integration
